RG 450

STERILISATION REELS MACHINE

This machine realises sterilisation reels from two bobbins of medical paper and film or other complexes.

In case of pre-printed paper with indicators the production of hospital reels is also possible.

The reels with an adjustable length up to 200 m are manufactured at a speed up to 17m / min depending on the type of material used.

The winding station equipped with 2 or 4 reels holder is controlled through servomotors for an optimum use.

Dimensions:

L 3,52 m x W 1,10 mx H 1,85 m

Weight:

970 kg

Pressure:

6 bars

Power:

400-Watt 3,5 kW

Options:

double or multi lane version,
automatic edge guide system, printing units.
Other on demand.

Sterilisation reels dimensions:

Length: until 200 m

Width: from 70 to 450 mm

Packaging material:

Paper/ PET-PP or PET-PE, Tyvek®/PET-PE
Peel, Alu/Alu, or other (consult us).
